

The IEEE Virtual Events Program in Africa presents:

SMART GRID 2017

FOUNDATIONAL SUPPORT SYSTEMS

Hosted by the IEEE Ghana Section

IEEE is happy to announce the latest installment in the IEEE Virtual Events Program in Africa, which provides virtual access to recorded content from select IEEE conferences. Participants will gather in-person to watch presentations and discuss ideas with fellow attendees. Attendees will then be granted access to the virtual environment to view the content on-demand, along with additional 'bonus' content not presented during the in-person session. (Note: On-demand access will only be made available to those who attend the in-person session.)

Our latest event is on **Smart Grid** and features content from IEEE Smart Grid, including:

- *Foundational Support Systems*
- *Smart Rural Grid: Digitalizing the Electric Grid*
- *Why an Active Grid Demands Greater Collaboration*
- *The Learning Path Towards a Smart Grid – Changes in Standards and Business Practices Post 2018*
- *IEEE Smart Grid: Vision, Mission, Community*

Event Details

➤ **Date and Time:**

Wednesday
6 December 2017
9:00am – 5:00pm

➤ **Location:**

Electricity Company
of Ghana Limited
Project Office
Engineering Conf. Rm.
Accra, Ghana
